

Two Seaeeye Falcon ROV's

Roving Eye Enterprises currently operates two high performance Seaeeye Falcon ROVs, models 12167 and 12169. The ROV's can be mobilised with a Hydrolek 4 function manipulator incorporating a 19mm rope cutter and a 12 megapixel stills camera. All ROV's utilise sonar cp probes and high resolution cameras on board, assisted by powerful lighting, for enhanced pilot control and optimum video footage in poor conditions.

An experienced work team consisting of ROV pilots, tethermen and boat skipper with many years experience working together specifically in the renewables industry guarantees your job will be successfully completed in the agreed upon time frame and on budget. Challenging work conditions require creative thinking and problem solving skills. Roving Eye has a track history of successful work with clients in this field.

ROVING EYE ENTERPRISES SPECIALISTS

Roving Eye provide cost effective ROV services and work boat charters in Orkney Scotland. We offer our clients a professional and experienced team for a variety of tasks.

Roving Eye

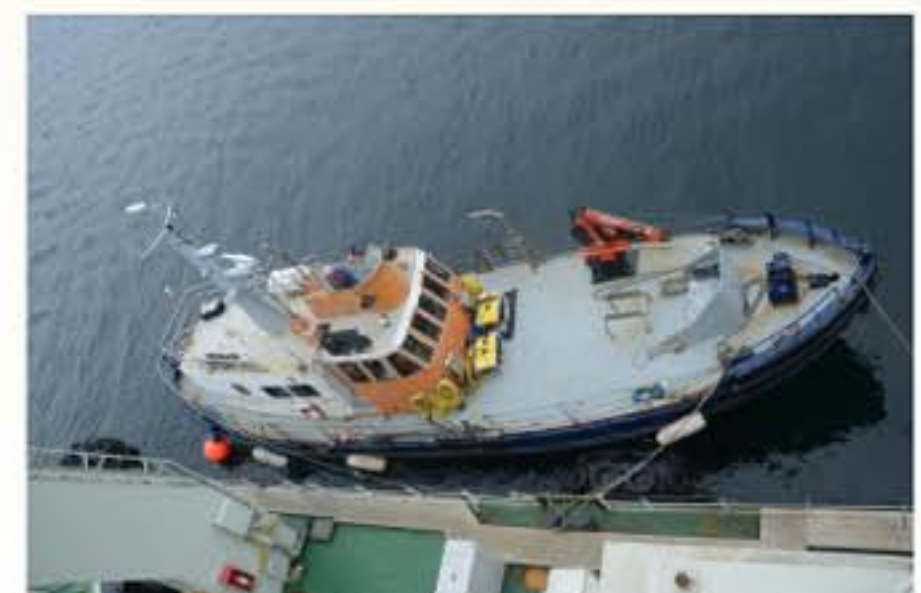

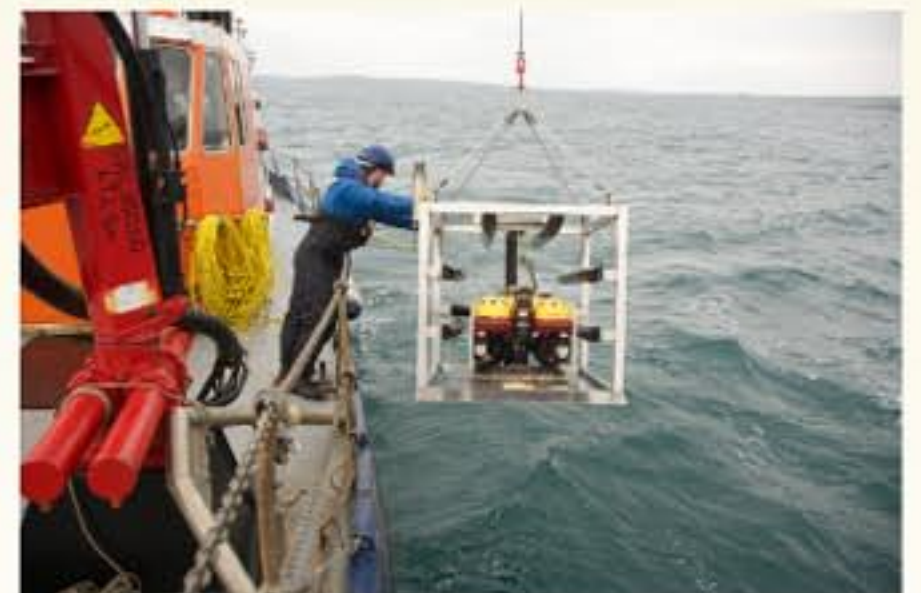

WORK BOAT AND ROV CHARTER

Our latest ROV facilities allow surveys in challenging locations; to include pipelines, cables, jetties, piles, seabed and hulls. Object and cable recovery, diver safety and visual surface support expand our service capability. We can arrange a complete survey package tailored to our client requirements, including multi beam, bottom sub profiler, side scan sonar and ADCP systems.

The recently expanded Roving Eye fleet allows us to push our working capability further in and offshore into new locations.

We also can offer lifting equipment via Knuckle-Boom crane to 600 kg at 5.5 metre extension.

Naturally our focus extends to safety throughout all operations, our craft are certified and coded for the task in hand, while our friendly crew are experienced and happy to integrate with our clients team members.

VESSELS

Roving Eye Enterprises operates a fleet of specialist work boats based in Orkney.

The Advance is an adaptable vessel with jet drives making it extremely maneuverable and able to work in shallow water. She is a 15M category 2 work boat.

The Lodesman is a very capable and maneuverable vessel, able to work in the extreme environment of the Pentland Firth in safety and comfort. She is a 22M category 2 work boat.

The LiveWyre is an 8.2M RIB with a 250HP inboard diesel giving speeds in excess of 30 knots and is well suited for crew transfer, equipment hook-up and support for larger vessels.
